

White Vinegar

Vinegar works as a milder disinfectant. Besides, it's better than bleach for cleaning mineral stains and soap scum.

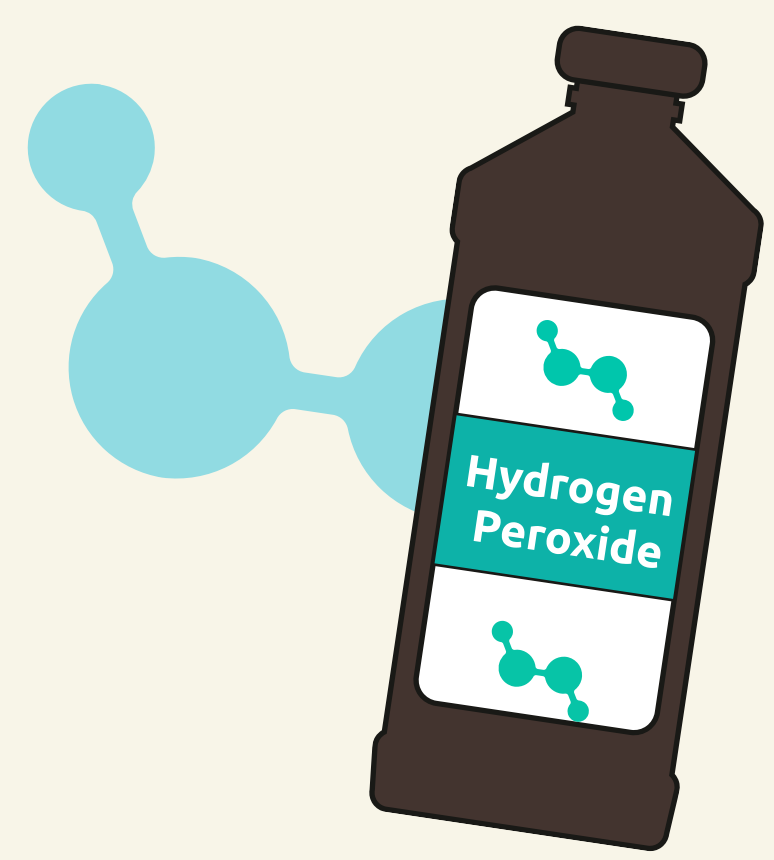

Baking Soda

This kitchen staple is also a whitening agent. Use it instead of bleach on your laundry and for stain removal.

Hydrogen Peroxide

Hydrogen peroxide can help you brighten and disinfect almost any surface (without dangerous chlorine fumes!)

Lemon Juice

Citric acid is great for removing stains and foul smells. Ditch the bleach and pour lemon juice into your laundry!

Castile Soap

A concentrated, vegetable-based soap. It's a natural alternative to bleach and almost any other cleaning product.
